

Energy Economist / Energy Analyst

The Milken Institute is an independent economic think tank. Our mission is to improve the lives and economic conditions of diverse populations in the U.S. and around the world by helping business and public policy leaders identify and implement innovative ideas for creating broad-based prosperity.

Research Economist: The SAVE program at the Milken Institute is conducting research on energy independence and the transition to cleaner, alternative sources of energy. The program is looking for an energy economist/policy research associate with experience and knowledge in the energy sector. Requirements include an understanding of technologies, policies, markets and incentives. The individual must be numerate and capable of drawing policy inferences from statistics. The successful candidate must have an understanding of alternative energy sources and technologies as well as knowledge of the latest academic efforts along these lines. The ideal candidate will have experience, a Masters Degree or PhD in economics, or a related field; be a clear thinker and writer with a good working knowledge of statistics; and possess advanced Excel and PowerPoint skills along with an ability to supervise the management of large data sets.
